PROFESSIONAL SUMMARY

Technology student with a strong foundation in software engineering and UI/UX design, eager to apply technical expertise to complex development challenges. Possesses hands-on experience in Python, JavaScript, and web development, complemented by a deep understanding of AI/ML integration and user-centric design principles. Demonstrated ability to deliver functional digital products through collaborative team environments and rigorous research methodologies.

EXPERIENCE & PROJECTS

Ural Federal University, Yekaterinburg, Russia **July 2026 - Present**

Summer Intern

- Selected for a competitive international summer internship program, contributing to assigned technical and research tasks within a rigorous and fast-paced academic environment at the university level, using Figma.
- Collaborated with an international cohort of students and mentors to enhance technical and analytical skills through intensive coursework and the successful execution of applied research projects.

Labmentix India **April 2026 - Present**

UI/UX Designer

- Designed comprehensive UI/UX concepts for digital products, applying advanced user research methods to translate complex user needs into wireframes and interactive high-fidelity prototypes.
- Collaborated with cross-functional teams to iterate design solutions, ensuring consistent visual language, optimal usability, and full accessibility compliance across all critical product touchpoints.

ProjectX - AI-Powered Student Collaboration Platform

- Built a student collaboration platform with team formation, project applications, and task management.
- Integrated AI-based team matching, skill-gap detection, recommendations, and email notifications.
- Tech: Node.js, Express.js, Python, REST APIs, AI/ML

Gun Detection System - Real-Time Threat Monitoring

- Developed a computer vision system to detect firearms in video feeds using YOLO and OpenCV.
- Implemented detection bounding boxes, confidence scores, and threat alerts.
- Developed computer vision solutions using Python, YOLO, OpenCV, and NumPy to detect and track objects in real-time across multiple datasets.

SKILLS & LANGUAGES

Technical: Python, JavaScript, Node.js, Express.js, REST APIs, SQL, HTML5, CSS3, Frontend, Backend, Java, AI Tools, Web & App Development, Database Management, Git, GitHub

Planning & Analysis: UI/UX Research, Cross-functional Collaboration, Analytical Thinking, Project Management, Figma, Prototyping

Languages: English, Hindi, Marathi

EDUCATION

Bachelor of Technology, Artificial Intelligence and Machine Learning **Expected 2028**

Sanjivani College of Engineering, Kopargaon (Sanjivani University)
